Hi Guys

Uploading of Music on Hold, Firmware and Backups is now supported natively from the GUI 4.0!!

Due to large changes in the core of switchfin/asterisk you will need to reset all configs when upgrading to the new revision.

We have also noticed significant speed increases in the GUI, from this upgrade.

This is all thanks to Jason Kenah from <http://ii-tec.com>

Any issues please address them in the forum.
